Description:

Mobius MBX Bucker Hemp Debudder & Bucking Machine

The Mobius CannBucker MBX Bucker is a gentle beast that's waiting for you to feed.

Capable of de-stemming up to 150 pounds of buds an hour, the MBX is capable of replacing up to seven hand buckers. The MBX is compatible for both wet and dry buds, and uses variable pulling speed to take on the load. Even as a high-powered machine, the MBX remains gentle on your buds, yet exerts full force to separate stems. The MBX features die plates that give you up to seven **(7) feed holes** that accommodate **stems of up to half an inch in diameter**. A stainless steel chute also gives you the option to move your buds to a catch tote or an optional conveyor for automated systems. Expect premium quality as the MBX uses quality stainless steel, and features an ergonomic design for perpetual operations. The MBX also features an integrated stem chipper, that chops up the stems into smaller pieces and collected into a catch tote. The diced stalks let you put more in your waste tote, and reduce downtimes for waste disposal.

Specifications

Description	Specification
WET/DRY CAPABLE:	YES

CONSTRUCTION:	304 STAINLESS STEEL
SPEED ADJUSTMENT:	10-Jan
NUMBER OF FEED HOLES:	7
MAX HOLE DIAMETER:	1/2"
INTEGRATED CHIPPER:	YES
STEM PULLER MOTOR:	1/2HP
CHIPPER MOTOR:	3/4HP
NUMBER OF CHIPPING BLADES:	2
POWER REQUIREMENTS:	110V, 15AMPS
DISASSEMBLY TOOLS:	5/32" ALLEN KEY
FITS THROUGH A 32" DOOR:	YES
WIDTH:	28"

LENGTH:	40"
HEIGHT:	52"
WEIGHT:	275LBS
CERTIFICATIONS:	ESA CERTIFICATION
